**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-5 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Notorgiacomo, Jr. 5,030,674, with Blount 6,054,515 as evidence.

3. Notorgiacomo, Jr. discloses applicants' stabilizers in column 4, lines 2-18, Antiblaze 1045 in column 4, lines 54-56, blending with high impact polystyrene (HIPS) in column 4, lines 57-63. "Up to" (claims 3-5) includes zero. Blount ('515) shows the chemical name of Antiblaze 1045 in column 3, lines 3-5.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 1714

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 3-5 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Notorgiacomo, Jr. 5,030,674, with Blount 6,054,515 as evidence.

7. Besides the facts cited previously Notorgiacomo, Jr. also teaches that the flame-retardant, i.e. the cyclic phosphonate, is effective at concentrations of 2-50% by weight (column 4, lines 64-68). The polymeric composition can also contain plasticizers and antioxidants (column 6, lines 59-66). It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to select the minimum amount of flame-retardant necessary to flameproof the composition and to add the conventional additives cited by the reference.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekey whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
